

ME FRESHMAN ORIENTATION FOR 372

March 01, 2017

Freshman Orientation for Mechanical Engineering students was conducted on March 01, 2017 during Period-3 at the Tent Hall of Jubail University College. The main purpose of this annual meeting is to welcome freshman students and inform them about the Mechanical Engineering Degree Plan, Academic Advising and Co-curricular activities. The department also listens to questions, comments and suggestions of students.

The Chairperson of the Mechanical Engineering Department, Dr. Surajudeen Adewusi, gave the opening speech by congratulating the students for their achievements in joining Mechanical Engineering program. He advised the students to focus on their studies in order to graduate on time and they should feel free to contact the department on any issues of concern to them. Dr. Ghassan Nayal briefed the students about the ME Degree Plan and Prerequisites to be taken for the courses. He said that Mechanical engineers are in demand now, and projections for the future suggest a long-term need for professionals in this specialty. Also, he mentioned about some careers which students can take after graduation.

Dr. Maroof Morsheed, the Co-ordinator of Academic Advising for Mechanical Engineering, highlighted about the new rules implemented in the academic advising from this present semester 372. He also introduced the departmental academic advisory committee members to the students. Finally, during the open session students asked various questions regarding the Mechanical Engineering program to which ME faculty members answered to the satisfaction of the students.
